

NFF Performs Information Security Services for US Census Bureau

Washington, DC, February 2010 - NFF, Inc. has been awarded a two year contract to perform Information Security Services for US Census Bureau.

NFF will be responsible for the architecture and implementation of information security improvements to the entire bureau's communication infrastructure. NFF will be responsible for tasks related to complex network security solutions including Cisco's Adaptive Security Appliances, Network Analysis Modules, Clean Access Servers, Content Filtering Servers, Security Monitoring Analysis and Response Systems, IronPort web and email modules as well as RSA Authentication Systems.

In addition NFF will evaluate network systems to eliminate problems and proposing and implementing system enhancements to ensure performance, reliability and security of the data network. NFF's technical expertise and knowledge of industry trends and best practices will be utilized to develop and support a modern network architecture with a focus on efficiency, functionality, security, scalability and cost savings.

About United States Census Bureau:

As part of the United States Department of Commerce, the Census Bureau serves as a leading source of national demographic and economic data. The most visible role of the Census Bureau is to perform the official decennial count of people living in the USA. One core result is to decide the number of seats each state is allowed in the House of Representatives. The agency director is a political appointee selected by the President of the United States.

The Census Bureau has been headquartered in Suitland, Maryland since 1942. A new headquarters complex was completed in 2007 and supports over 4,000 employees. The Bureau also operates regional offices in 12 cities: Boston, New York City, Philadelphia, Detroit, Chicago, Kansas City, Seattle, Charlotte, Atlanta, Dallas, Denver, and Los Angeles. The National Processing Center is located in Jeffersonville, Indiana. Additional temporary processing facilities are used to facilitate the decennial census, which employs more than a million persons.
