

Prince William County Government Engages Networking For Future To Validate Cloud Provider Service Level Agreement

WASHINGTON, October 17, 2018 – Networking For Future, Inc. today announced that [Prince William County](#) (PWC), Virginia government engaged Networking For Future (NFF) for a solution to validate the performance associated with their recent migration to a Cloud platform. NFF implemented a Riverbed application performance management solution to enable PWC to view their end-user performance, quickly pinpoint issues associated with their Cloud provider service level agreement (SLA), and deliver to the prominent Cloud provider detailed analytics required to resolve the service issues.

NFF selected a Riverbed application performance management (APM) solution to determine if the problems resided in the Cloud platform, the wide area network (WAN), the local network, or the end-user devices. As a result, PWC was able to hold the Cloud provider accountable for delivering on their SLA metrics.

"This flagship win is a powerful demonstration of the combined value the NFF professional service team and Riverbed APM solution can bring to customers. As cloud services and end-user applications become ever more inseparable, there is a clear need for the combined technical services and operational systems expertise we can deliver," said Hess Fatemi, chief executive officer for NFF.

About Prince William County Government

Prince William County government operates with a eight-member Board of County Supervisors elected by the residents of Prince William County and is the policy-making body for the county government. The Board adopts local laws, sets policies, decides how money will be spent and makes local land use decisions. The Board appoints a County Executive to act as the chief administrative officer and oversee the County government on a day-to-day basis.
