

## **United Medical Center Selects Networking For Future to Modernize Their Enterprise Infrastructure**

WASHINGTON, September 22, 2020 – Networking For Future, Inc. (NFF), a performance-focused IT business solutions provider, today announced it has been awarded a United Medical Center (UMC) contract for IT network infrastructure solutions and IT professional services. As the only public hospital in Washington D.C., this contract supports modernizing and re-architecting the UMC network infrastructure to meet the needs of UMC medical personnel and the growing patient population.

United Medical Centers' goal is to affirm the hospital's commitment to developing innovative IT strategies and real-world solutions to improve the patient experience. UMC also wants to leverage the information technology (IT) investment to improve performance in business operations, administrative management, safety, and security.

Under the contract, NFF and its partner, Integrated Electrical Technologies Corporation (IET), will completely redesign the UMC network, while upgrading and/or replacing the switches, routers, and cabling. In addition, NFF is leveraging their professional services team to enhance the engineering design of the new network.

"This win further substantiates NFF's demonstrated capabilities in enterprise network modernization efforts for mission critical healthcare providers," stated Hess Fatemi, chief executive officer at NFF. "We are proud to help United Medical Center continue to deliver unparalleled service to the community."

"NFF's solution fits UMC's enterprise network infrastructure strategy and it can be expanded to include other services over time." said Glen Carter, vice president of technology services. "This network architecture will reduce future IT system integration complexity and improve IT security and patient safety."

### **About Networking For Future, Inc.**

Networking For Future, Inc. (NFF) is a Washington, DC based company offering a performance-focused approach to delivering transformational IT business solutions. We take pride in keeping users productive and engaged by providing business and IT teams with the solutions they need to improve their performance in a dynamic, connected world.
