

## **Small Team, Small Budget, Immense Security Requirements Seminar At MEEC Conference 2022**

WASHINGTON, April 28, 2022 – Networking For Future, Inc. (NFF), a Mid-Atlantic-based, performance focused IT solutions provider, today shared that several members of the NFF management team and Cisco Systems co-presented at the Maryland Education Enterprise Consortium (MEEC) Member Conference and Vendor Showcase 2022. The seminar entitled “Small Team, Small Budget, Immense Security Requirements: Building a Secure Campus” provided MEEC members with a blueprint to efficiently purchase, install, and maintain security hardware, software, and technology related services even if they have small staffs and limited budgets.

The “Small Team, Small Budget, Immense Security Requirements” seminar highlighted the following:

- Small Team and Small Budgets, Same Security Challenges
- Voice Of The Customer Case Study
  - Mike Rogers: University of the District of Columbia / NFF
- Voice Of The Customer Case Study
  - Don Bryant: University of North Carolina at Pembroke / Cisco
- Must Have Minimum Security Portfolio

The MEEC Member Conference and Vendor Showcase 2022 featured technology leaders, technology-focused educational sessions for public and private K-20 educational institutions, federal institutions, and public libraries in the state of Maryland. It provided a terrific opportunity for members to meet MEEC’s vendors, attend educational workshops, and network.

“Cyber security is the #1 IT challenge for K-20 educational institutions today. Our security blueprint provides a robust, cost effective path-forward for all schools and does not require a large team or budget to install and maintain” commented Chris Peabody, chief strategy officer at NFF.
