

NFF Showcases Innovative Solutions At West Virginia Digital Government Summit 2022

WASHINGTON, August 4, 2022 – Networking For Future, Inc. (NFF), a Mid-Atlantic-based, performance focused IT solutions provider, today shared that several members of the NFF management team and Cisco Systems (Cisco) held a private network and security training event as part of the [West Virginia Digital Government Summit](#) (Summit) in Charleston, West Virginia.

NFF was a corporate sponsor of the Summit, hosted by Josh Spence, Chief Information Officer, State of West Virginia. The Summit focused on best practices and spurring innovation in the public sector for IT leaders across the West Virginia state and local government and K-20 education markets. The Summit featured technology leaders, tech-focused educational sessions for local government officials, and partnership-building opportunities for solution partners, like NFF.

“Our event provided an outstanding opportunity for IT leaders from across West Virginia to meet directly with NFF and Cisco,” commented Chris Peabody, Chief Strategy Officer at NFF. “The attendees heard in-depth information about Cisco’s next-generation network and security portfolio and NFF professional services, including architecture, design, security, and engineering support. All NFF services are backed by our Network Operations Center (NOC).”

About Networking For Future, Inc.
