

Securing the Hybrid Multi-Cloud Campus With NFF Identity and Access Control Solutions

Education is changing. From barriers to access and a growing digital divide to resource constraints, and mounting security threats, today is a time of unparalleled digital transformation.

In today's hyperconverged and hybrid world, identity management has never been more important. From access to devices on the network. to files and applications in the cloud, ensuring who has access to your resources has never been more critical to your campus.

About 46% of enterprises expect work-from-home policies to expand

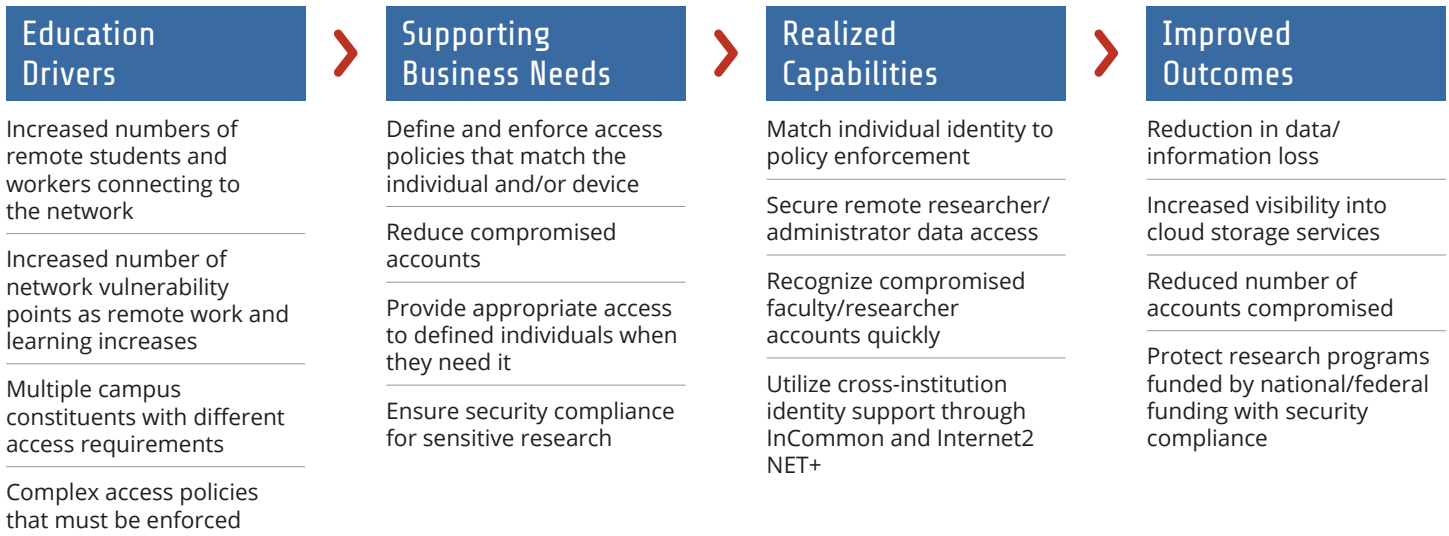

Most employees, 97%, want to feel safer when back in the office

By 2022, 75% of global organizations will be running containerized applications

The future of education is based on security solutions that are simple to use and manage, work together seamlessly, and are backed by world-class professional support.

That's where Networking For Future (NFF) comes in. We are all in for education.

Since 1996, NFF has delivered architecture, design, professional services, and hardware/software sales for education. As the world continues to change, we're here to help, and we're "all in" when it comes to education. NFF is and will continue to be an education company and your trusted technology partner.

NFF is passionate about improving your campus security and we offer a wide range of solutions to help manage your campus identity and access control needs. Let us take the struggle out of access control so you can focus on the success of your students and faculty. With NFF as your trusted partner, your enhanced access controls will result in greater student engagement and streamlined campus and IT operations.
