

**WASHINGTON, October 27, 2022** — Networking For Future, Inc. (NFF), a performance focused IT solutions provider, today announced that education industry veteran Pete Cevenini has joined NFF’s Education Practice as an Executive Education Consultant. Pete will support NFF and its education clients by providing strategic consulting services with a focus on the K-12 market.

With more than twenty-four years of technology leadership in the education market, Pete Cevenini’s addition to the leadership team enables NFF to continue to expand its solution portfolio beyond an institution’s network and security platforms. NFF’s education technology practice offers immediate value to clients by providing E-Rate and virtual Chief Information Officer (vCIO) services, business case and investment justification support, and comprehensive security and digital transformation roadmap development.

Chief Strategy Officer of NFF, Chris Peabody said, “Based on strong demand and NFF’s twenty-five+ years supporting the education market, expanding our education practice with a seasoned K-12 technology veteran like Pete Cevenini was a logical next step. Pete has been a well-respected technology leader in education for many years, and his work at Cisco focused on their mid-Atlantic education market makes him a perfect fit to add value to our K-12 education clients.

Before joining NFF, Pete was the Associate Superintendent for Technology and CIO for Montgomery County Maryland Public Schools, for five years. Previous to his role at Montgomery County, Pete held CIO roles at Charles County Maryland Public Schools and the Maryland State Board of Education. Pete was the Director, Workforce and Education Practice Lead, Internet Business Solutions Group at Cisco Systems from 2007 - 2013, and was a Principal and Director of Charles County Public Schools and Director of STEM programs before joining Cisco. Pete is a frequent speaker at education and technology conferences.
