

WASHINGTON, June 1, 2023 – Networking For Future, Inc. (NFF), a Mid-Atlantic-based, performance focused IT solutions provider, today shared that several members of the NFF leadership team presented at the Maryland Association of School Business Officials (Md ASBO) annual Spring Conference.

The Association of School Business Officials of Maryland <https://asbo.org/> is a professional organization which provides programs and services to promote the highest standards of school business practices through professional development, recognition, and the effective management of available resources. The 2023 Maryland ASBO Spring Conference featured business and business-focused educational sessions for public and private K-20 educational institutions in the state of Maryland. It provided a terrific opportunity for members to meet vendors like NFF and attend educational workshops, and network.

The NFF presentation entitled “IT & Business Officials Collaboration Fuels the Future of Education” provided ASBO members with a blueprint for how to work efficiently and collaboratively on issues that are outside of any one department’s portfolio of responsibility.

Areas covered in-depth during the seminar included:

- Cyber security insurance
- Ransomware attacks
- School safety and security
- Smart campus technologies
- Innovative teaching/learning programs like E-Sports and Gamification

“Cyber security and leveraging smart technologies to improve teaching and learning are huge challenges for K-20 educational institutions today. Our blueprint provides a robust, cost effective path-forward for all schools and does not require a large team or budget to install and maintain” commented Chris Peabody, Chief Strategy Officer at NFF.
