

# NFF ENHANCED SECURITY OFFERINGS

## One NFF Team – Unparalleled 24x7x365 Security

Organizations have bigger, more connected, and complex ecosystems than ever before. Connections between people, devices, and data are ever-expanding with billions of touchpoints. When everything is open and connected, businesses, government and education need to adopt new security strategies that move away from standalone, siloed protections and instead focus on detection, response, and recovery.

## The NFF Difference, Performance-Focused Security

The NFF team brings immediate and unparalleled value to our clients. With 25+ years of experience, we know that no single security solution works for every business. As a performance-focused security integrator, NFF provides expertise, consulting, and solution design from best of breed security partners to transform security with a SASE focused strategy. We deliver a comprehensive security roadmap and a clear path forward, from strategy and consulting to implementation and managed services that provides you with greater agility, reliability, performance, and lower security and IT costs. With a proven methodology, expert certified IT professionals, and managed services, we help you implement, manage, and maintain security solutions best suited to your workload and business requirements.

# Radically simplify your security and networking

Enterprise cyber security program requirements are complex and often require a comprehensive and well-coordinated team of highly specialized cyber professionals. The NFF security practice is comprised of both internal NFF security experts and trusted partners. To ensure success for your security projects, our solutions include nationally recognized security firms with the expertise and full independence to conduct all assessment activities, with comprehensive project oversight and ownership by the NFF professional services/cyber security team.
