SMART TECHNOLOGIES PRACTICE

At NFF, our Smart technologies practice joins people, devices, and applications to make insight-driven decisions to improve services, security and maximize resources. We accelerate the adoption of smart technology solutions, aid in problem solving, and amplify resources for the betterment of cities, communities, and campuses. We're committed to city and campus-first programming that inspires real conversation, meaningful connection, and approachable actions across all communities.

## WHY BUILD SMARTER CITIES, COMMUNITIES AND CAMPUSES?

Expand Equitable Access

Build Secure, Resilient Infrastructure

Power Remote Work and Trusted Workplaces

We are passionate about helping cites, communities and campuses create new opportunities for citizens, businesses, and students through technological innovation. Working closely with our smart technology and security partners, we bring together a collection of intelligent systems providers for safety, energy, critical infrastructure, advanced networks, data management, mobility, engagement and governance solutions.

NFF Smart Technology Practice Areas

Comprehensive Management Platforms

Dashboards

Advanced analytics

Sensor visibility and anomaly detection

Secure, integrated IT and OT

Smart Buildings

HVAC optimization / Energy consumption

Indoor temperature and humidity

Indoor flood detection

Access control / Cameras

Transportation

Smart Bus/Rail

Mobile asset tracking

Traffic monitoring / video analytics

Intelligent parking

Environmental Monitoring

Flood detection

Wildfire smoke sensors

Outdoor Temperature and humidity

Air quality

Industrial / Critical Infrastructure OT

Smart metering

Water leak detection

Smart lighting

Video surveillance and advanced analytics

Public Safety
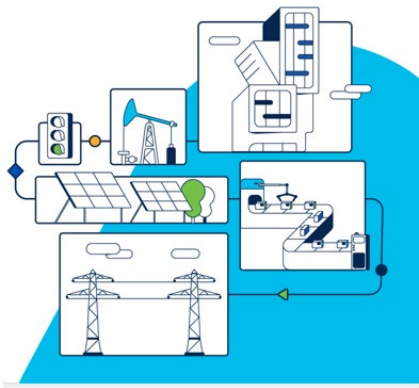

Weapons detection

Shot Spotter

Video analytics

Mass notification and alerting systems

NFF IoT/OT Smart Technology Approach

Start with the Network → **Prioritize Security**

Deliver Value with Actionable Data ← **Focus on IoT/OT Integration and Design**

> Smart Technologies Practice

> Innovative Fiber-Optic Cable Solutions
> Smart Street/Smart Lighting
> Secure IOT/OT Performance Platforms
> Smart Safety/Video Surveillance Systems (VSS)
> Next Generation Wireless Networks
> Sensors and Advanced Analytics

> Strategic Partners

NFF has strategic partnerships with many of the world's leading technology solution providers to enable us to deliver transformational IT business solutions that meet our customers' performance modernization requirements.
