

# Assurance and Visibility Across Every Network

## Unlock Full Visibility and Faster Resolution with NFF

With NFF's Network Assurance Service, organizations gain real-time visibility, faster incident resolution, and an enhanced digital experience for every user without overwhelming internal IT teams.

NFF delivers a proven combination of technical expertise, customer focus, and operational flexibility through its ThousandEyes managed services. Clients benefit from white-glove onboarding, hands-on optimization, and ongoing support delivered by seasoned network assurance professionals.

With a customer-centric approach to contracts and pricing, NFF provides a trusted partnership built on agility, transparency, and measurable results.

Let NFF activate, elevate, and maximize your ThousandEyes investment so your IT staff can stay focused on the strategic priorities that matter most.

### END-TO-END VISIBILITY

## Experience Has a Path. We Map It.

Every user interaction moves through a complex system of networks, clouds, and services. ThousandEyes visualizes that path and connects performance issues to their source.

## THE INTERNET, YOUR NEW ENTERPRISE BACKBONE

# The Benefits of NFF's Network Assurance Service

NFF's Network Assurance Service provides a seamless, expert-driven approach to network visibility and performance monitoring, giving organizations the confidence and flexibility to adapt in a dynamic digital landscape.

 <p>White-glove ThousandEyes portal activation &amp; agent installation</p>	 <p>Continuous platform refinement of network and app measurements</p>	 <p>Ongoing access to experts and expertise</p>	 <p>Expand or decrease monitoring as needs change</p>	 <p>No minimum agent requirements</p>	 <p>Annual or month- to-month billing</p>

## Why Choose NFF For Network Assurance Services?

**NFF MANAGED NETWORK ASSURANCE SERVICE:** NFF delivers a proven combination of technical excellence, customer focus, and operational flexibility through its ThousandEyes Managed Network Assurance Service. Clients benefit from white-glove onboarding, hands-on optimization, and ongoing support provided by seasoned network assurance experts.

With NFF's Managed Service, organizations can realize the full value of ThousandEyes without the complexity of standing up and managing their own portal. NFF simplifies deployment, reduces operational overhead, and accelerates time-to-value through a fully managed, expert-led experience. Combined with flexible engagement models and customer-friendly pricing, NFF Managed Network Assurance Service offers a cost-effective and scalable solution for organizations seeking enhanced network visibility, faster issue resolution, and improved digital experiences without adding administrative burden or straining internal resources.

**NFF NETWORK ASSURANCE SERVICE FOR CISCO DNA:** Organizations that have invested in Cisco DNA Advantage or Premier subscriptions already have valuable ThousandEyes entitlements built into their licensing. Yet many of these capabilities remain unused or underutilized due to resource constraints, limited awareness, or uncertainty about how to deploy and maximize the platform.

With NFF's Network Assurance for Cisco DNA, where our experts focus on activating, elevating, and enhancing your ThousandEyes portal experience. Your organization gains real-time visibility, faster incident resolution and an improved digital experience for every user without overburdening internal IT teams.
